

Rural Business Sector

**A dedicated team
with specialist
knowledge**

In our 100 year history, agriculture has always been and continues to be, an important sector with which we are proud to be associated. We act for well over 450 farming businesses and more than 45 landed estates, giving you a breadth of knowledge and experience in dealing with the many issues clients face.

Whilst the countryside and farming practices have changed over the years, our agriculture team continues to be respected as specialists and experts who understand the commercial needs of the modern farmer and the countryside in which they operate.

From advice on minimising tax, appropriate business structures, assistance with financing to dealing with VAT uncertainties, we can provide the support to ensure your success.

In recognition of the importance of preserving farming assets and wealth for the next generation, we have considerable expertise in the areas of inheritance tax matters, capital gains tax advice and succession planning.

We have also been active in offering sound financial advice regarding new ventures and diversification projects.

Building long term relationships is key to understanding the needs of our clients, their family and their business and allows us to work together to achieve their goals.

Our dedicated team of specialists deliver timely, commercial and proactive advice with a quality service in a cost efficient way.
